Fifty-Five Years of Chair Making

Main Office and Factory: Marietta, Ohio

1856

T

HESE illustrations of the Marietta Chair Company's plant at the time of its organization in 1856 and as it appears today, will convey some idea of the marked growth of our institution. The story of this upbuilding is one of struggles and triumphs. Our immense plant of today covering 13 acres, embracing buildings of stone,

brick and concrete, and specially constructed machinery, is not the result of good luck or the uncourted favor of a purchasing public. Almost totally destroyed by fire in 1874, later suffering heavy losses by tornado and flood, we worked on undaunted gaining our position of commercial success by honest and persistent effort. A union of enterprise wherein the interests of employer and employe have gone hand in hand for mutual benefit, producing a line of high grade chairs, unexcelled in style, finish, variety and quality. These factors have won for us prestige and trade support. Nor have we been satisfied to rest on our oars. Realizing that the trade

Pittsburg

Cincinnati

appreciates prompt and efficient service, short hauls and dependable goods, we established warehouses in Pittsburg in 1881, in Cincinnati in 1895, and in Kansas City in 1910, carrying complete stocks of our own manufacture as well as a general line of medium and high-grade furniture. These products of reliable manufacturers, illustrated in our Furniture Catalogue, we handle in large quantities on a jobbing basis. We are thus enabled to meet the demands of the trade at all times and shall still endeavor to merit the confidence of our customers as in the past, and to maintain our position in the van of the march for supremacy.

No. 3 Folding Chair—Made of Hard Maple, finished natural. Packed six in a bundle. Weight, 100 pounds per dozen.

In our Folding Chairs we are not compelled to sacrifice efficiency for the folding principle. No part of the short legs or seat frame is weakened by being slotted out to provide the folding feature.

With our construction we are not obliged to tie the short legs together at the bottom with a rod to prevent the chair from collapsing, and to hold the folding principle in line.

Experience has taught that this rod is constantly getting broken, rendering the chair useless; is in the way in folding, and is very objectionable in a folding chair.

Note the bolt through seat, and the steel sleeve. The simplest, most durable and only positive device made for a Folding Chair.

NOT BE RESPONSIBLE FOR LOSS OR DAMAGE IN TRANSIT

SPECIAL NOTICE

Our goods are in perfect condition when they leave the factory. Before accepting a shipment from railroad company and receipting for same in GOOD ORDER, have your teamster carefully examine the goods. If damaged, have your freight agent note the nature of same on your freight bill. You can then file claim against railroad company for damages.

WE WILL NOT BE RESPONSIBLE
——— FOR ———
LOSS OR DAMAGE IN TRANSIT

PACKING

We call special attention to the manner in which our goods will be packed this season. We have had so many complaints of breakage and chafing of goods in transit, due to rough and careless handling by railroad employees that we have decided to CRATE all light weight polished goods liable to breakage if wrapped only. This extra precaution, together with the padding of our goods, as usual, will certainly insure safe deliveries. We ask you to bear this in mind when ready to order CHAIRS and ROCKERS and come to us, thereby avoiding the annoyance and expense of receiving goods in a damaged condition.

REPAIRS

We are always willing and glad to furnish customers any reasonable amount of repairs, but will not allow for transportation. All such charges should be added to your claim for damages against the carrier delivering the goods.
